Dear Ms. Tonsgard:

RE: Dangerous Waste Compliance Inspection at King County Airport Maintenance
RCRA ID# WAD980986848 on February 16, 2005

The Department of Ecology inspected King County Airport Maintenance to determine compliance with the Dangerous Waste Regulations, Chapter 173-303 WAC. As a result of that inspection, a report was sent to you detailing actions that needed to be taken to correct items of non-compliance. You were further directed to sign and return a certification with supporting documents showing that you had corrected the items of non-compliance.

Ecology has received your submittal stating that you have addressed and corrected the items of non-compliance. This letter serves to notify King County Airport Maintenance that the Department of Ecology considers the actions requested in my March 22, 2005 compliance letter satisfactorily completed.

Ecology may re-inspect your business to verify that these steps have been taken and that your facility remains in compliance with the dangerous waste regulations. Ecology conducts dangerous waste inspections to verify that dangerous waste is being safely and properly managed to protect human health and the environment in compliance with the regulations. It is important to emphasize that all dangerous waste generators are responsible for complying with the dangerous waste regulations.

If you have any questions or would like to correct or clarify information in this letter, please contact me at BSmi461@ecy.wa.gov or (425) 649-7026.

Sincerely,

Barbara Smith, Hazardous Waste Compliance Inspector
Hazardous Waste and Toxics Reduction Program
